

DISTINCTIVENESS OF THE INSTITUTION IN TERMS OF ITS VISION, PRIORITY AND THRUST

Our vision statement is not only emphasized on knowledge and skills for employability, but also for responsible citizenship. Apart from regular curriculum delivery we have decided to work to impart lofty thought the students and there by motivating him/her to respond to social needs and responsibilities. Our vision also considers that education is a medium to impart the legacy of cultural, social and political values to the younger generation. Modern society is facing many challenges despite economic and technological progress, and students need to be empowered to manage them without losing their self-esteem. Distinctiveness of the institution lies in this area. IQAC has planned to create “social awareness programs” to instil a positive attitude among the students. We think that it is absolutely essential for the student to understand the society of which he is apart and if is aware of the problems, needs, owes of the society; he would truly derive the meaning of life.

It encompasses such activities relate to the following areas; Alcoholism, Black money, child abuse, communalism, corruption, violence against women, dowry, farmers suicide, illiteracy suicide, wasting food, juvenile delinquency to mention the few. Each faculty is assigned with a topic and expected to collect sufficient information resources before facilitating to the students. Such information is also documented under the preview of IQAC.

Teachers are expected to discharge adequately their responsibilities on the dates prescribed by the IQAC. During the process student’s attendance is strictly maintained. Power point presentations are used in these awareness programs. Apart from the above defined programs class mentors help the students to deal with the negative influences and tell them that how stress will help or hinders us depending on how we react to it during the course of their lectures. This approach has enhanced academic performance of our students while comparing to the other local institutions.

Attuning with vision statement NSS takes a leading role in order to develop students’ personality through physical labour, service and give them an experience of good life. Activities designed by the coordinator creates the feeling of “Not me... but you” among the participants. Thus, the thrust area of this college is to “reach the society” rather than confining with prescribed syllabi. Students should realize that their knowledge, labour and energy is not for them alone, but important for the entire society. Our distinctiveness lies in this factor and stands different from others.
